PROFILE

Dedicated B.Tech Computer Engineering student and aspiring Full-Stack (MERN) Developer with hands-on industry experience through a Web Development Internship at Amtech Electronics India Limited. Strong foundation in full-stack web development, analytical thinking, problem-solving, teamwork, and leadership. Passionate about developing innovative software solutions and continuously enhancing technical expertise.

INTERNSHIP

Completed a 1-month Web Development Internship at Amtech Electronics India Limited, where I contributed to the redesign of the Amtech PEES (Power Electronics & Embedded Systems) website and gained hands-on experience in responsive web development and UI implementation.

EDUCATION

BACHELOR OF TECHNOLOGY IN
COMPUTER ENGINEERING
MADHUBEN AND BHANUBHAI PATEL
INSTITUTE OF TECHNOLOGY
(2023 – 2027)

- Class 10: 94.00%
- Class 12: 76.76%
- Last Semester SGPA: 9.43
- Current CGPA: 9.49

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, React
- Backend: Node.js, Express.js
- Database: MongoDB, SQL
- Programming: C, C++
- Concepts: Data Structures & Algorithms
- Design: Figma

SOFT SKILLS

Leadership and Teamwork

LANGUAGES

- English
- Gujarati
- Hindi

PROJECTS

AGRIDIRECT

- Built a MERN-based agricultural supply chain platform connecting farmers, distributors, retailers, and consumers. Implemented blockchain traceability, QR code verification, and AI-powered features to enhance product authenticity, transparency, and fair pricing.

STUDY BUDDY – A SMART STUDY COMPANION

- Designed and developed a MERN-based student productivity platform to streamline study management and improve learning efficiency. Implemented features such as Pomodoro timers, flashcards, note sharing, deadline tracking, collaborative study circles, and aptitude learning modules.

CAMPUSCHAIN MARKETPLACE

- Designed and developed a decentralized Web3 marketplace using React, Node.js, and blockchain technology for secure campus transactions. Implemented blockchain-based payments, MetaMask integration, smart contracts, and trustless peer-to-peer trading.

SEEKNCART

- Developed a web application that helps users find the best deals across multiple e-commerce platforms like Amazon and Flipkart. Implemented price comparison and discount analysis features to help users identify the most cost-effective purchasing options.

ACHIEVEMENTS

SIH 2025	HackX	Paranox 2.0	CVMU Hacakthon
Selected for Grand Finale in SIH 2025	Selected for Grand Finale in HackX 2025	Selected for Grand Finale in Paranox 2.0 2025	Participated in both CVMU Hackathon 2025 and 2026
