PROFILE

Dedicated B.Tech Computer Science student and MERN Stack Developer with strong analytical, problem-solving, and leadership skills. Actively involved in projects and team initiatives, with good time management and communication abilities. Passionate about applying technical knowledge and continuous learning.

EDUCATION

BACHELOR OF TECHNOLOGY IN
COMPUTER ENGINEERING
MADHUBEN AND BHANUBHAI PATEL
INSTITUTE OF TECHNOLOGY
(2023 – 2027)

- Class 10: 94.00%
- Class 12: 76.76%
- Last Semester SGPA: 9.81
- Current CGPA: 9.50

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, React
- Backend: Node.js
- Database: MongoDB, SQL
- Programming: C, C++
- Concepts: Data Structures & Algorithms

SOFT SKILLS

Leadership and Teamwork

LANGUAGES

- English
- Gujarati
- Hindi

PROJECTS

AGRIDIRECT

- Developed a smart agricultural supply chain platform connecting farmers, distributors, retailers, and consumers using the MERN stack. Implemented blockchain-based traceability, QR code verification, and AI-powered features to ensure product authenticity, transparency, and fair pricing.

STUDY BUDDY – A SMART STUDY COMPANION

- Built a student-focused productivity platform using the MERN stack to organize and improve study habits. Integrated features like study timers, flashcards, note sharing, deadline reminders, collaborative study circles, and an aptitude learning module to enhance focus and academic performance.

CAMPUSCHAIN MARKETPLACE

- Created a decentralized Web3 marketplace using React, Node.js, and blockchain technology to enable secure buying and selling within campus. Implemented crypto-based transactions, decentralized ownership, and trustless peer-to-peer interactions without intermediaries.

SEEKNKART

- Developed a web application that helps users find the best deals across multiple e-commerce platforms like Amazon and Flipkart. Implemented features for price comparison and discount calculation to identify the most cost-effective options, along with a user-friendly interface for seamless browsing.

CERTIFICATES

SIH 2025

Selected for Grand Finale in
SIH 2025

HackX

Selected for Grand Finale in
HackX 2025

Paranox 2.0

Selected for Grand Finale in
Paranox 2.0 2025

CVMU Hackthon

Participated in both CVMU
Hackathon 2025 and 2026
